

Credit Name: CSE 2140 2nd Language Programming

Assignment Name: Exercise 9

Error Log Entry

What error message did you encounter (if any)?

No

What unexpected behavior did your program exhibit?

When I test possible random values, instead from 1 to 20, I only test from 1 to 5. And I see that the random values do not include number 5

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

This is logic error

Include a screenshot of specific lines of code.

```
// Setting the guessing game
Random r = new Random();
int ComputerNum = r.nextInt(5 - 1) + 1;
```

How did you fix the issue?

The possible random values are [0, 4] so I remove "-1" to have a new range [1, 5]

Provide the corrected code or solution using a screenshot.

```
// Setting the guessing game
Random r = new Random();
int ComputerNum = r.nextInt(5) + 1;
```

or

```
// Setting the guessing game
Random r = new Random();
int ComputerNum = r.nextInt(20) + 1;
```
